# Unlock the potential of employee training with Moodle Workplace
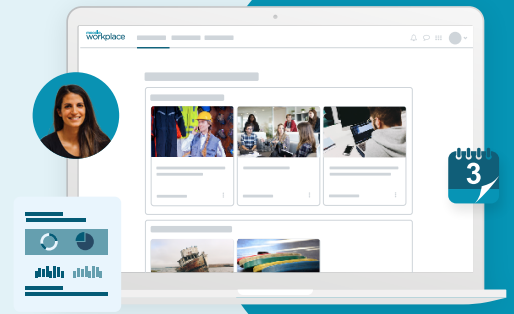

## moodle workplace™

**Moodle Workplace is a flexible and secure enterprise learning management platform** that streamlines employee learning, onboarding, and compliance training. Designed for flexibility, Moodle Workplace can be customised to fit your organisation's size, structure, and needs while seamlessly integrating with your software ecosystem.

# Boost employee engagement and learning outcomes

Moodle Workplace is built from Moodle LMS, an open source learning management system that can be customised to meet any learning environment, and benefits from Moodle's commitment to pedagogy and best practises in online teaching and education. It goes beyond the basic content features of most Corporate Learning platforms and is rich with activities in differentiated modalities that engage employees and improve learning outcomes.

### Automate repetitive tasks

Save time, hassle and costs by streamlining your workflows with smart tools to automate admin heavy tasks like course enrolments, certification awards or report sharing.

### Make it your own

Customise and scale your LMS to fit your organisation's unique needs. Add your own look and feel and make the platform available in more than 20 languages.

### Integrate your LMS with your existing systems

Integrate with third party platforms and services like content repositories, ecommerce or HR platforms to create a software ecosystem that supports all your business goals.

### Align learning with your business' goals

Create learning paths to upskill your staff, providing tailored training material to cater to individual employee needs and align the skills acquired with organisational growth.

### Evaluate the impact of Learning & Development

Get insights from powerful custom reports so you can adapt and improve your learning programs to drive better outcomes. Share badges & diplomas to reward your employees' achievements.
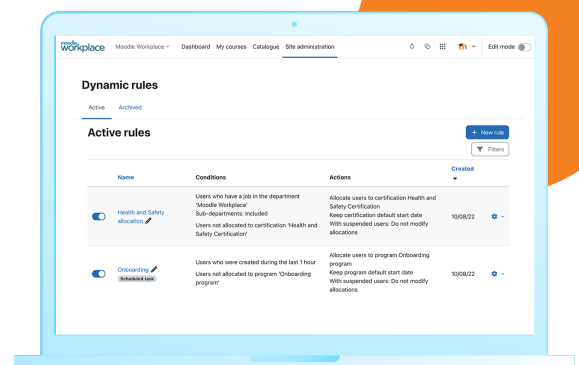

### AI, your way

A secure, flexible AI subsystem empowers you to integrate AI on your terms. Choose from supported AI providers, control access to AI tools, and create personalised content for impactful learning.

# Streamline onboarding and offboarding via automation

- Streamline employee onboarding and offboarding, with training, documentation, and meeting setup.

- Automate learning assignments by job roles or departments, providing personalised onboarding for new hires.

- Create reporting lines to keep managers up to date with their team's learning progress.

- Automate learning programs to maintain compliance training certifications.

- Effortlessly create temporary teams to facilitate knowledge-sharing across the organisation.

Automates actions upon first login to enhance employee onboarding experience.

# Easier for employees and for managers

- Centralised dashboard prioritises employee learning.

- View summary of learning programs or course requirements at a glance.

- Streamline the learning process by automatically assigning learners to suitable learning plans.

- Track learner progress, book appointments, and provide support.

- Create employee learning journeys with customised certifications.

- Streamline management process by accessing all necessary data from one place.

Displays warnings for overdue learning to identify and support learners falling behind.

# Promote employee upskilling

Supports L&D managers in cultivating a culture of self-directed learning among employees.
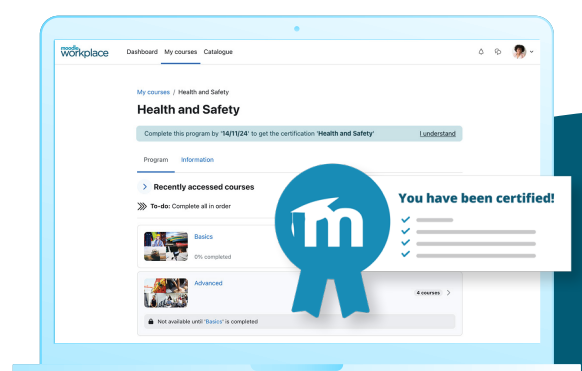

- Enhance upskilling and encourage personal growth by streamlining access to tailored learning materials.

- Elevate training effectiveness and boost digital literacy by leveraging Learning Catalogue's interactive learning tools.

- Employ advanced search functionalities to simplify the exploration of learning materials.

- Attract potential employees and promote organisational learning by offering courses publicly.

- Highlight recommended courses that align with your organisational goals to keep learners engaged.

# Manage compliance efficiently

- Automate personalised certifications for compliance and regulatory training.

- Set up automated reminders for expiring certifications.

- Track employee progress in compliance courses and generate automated reports.

Create automated recertifications and make sure you meet all legislative requirements.
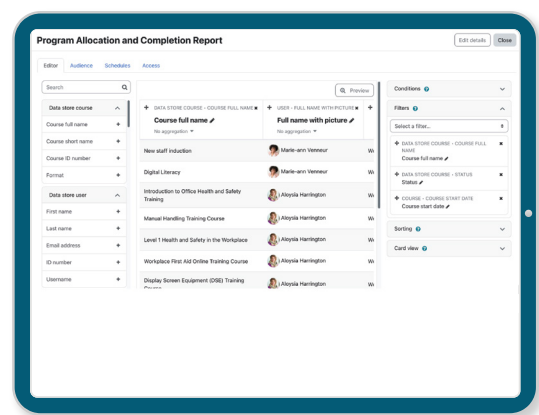

# Centrally manage multiple learning platforms

- Create individual learning environments with Moodle Workplace's multi-tenant architecture.

- Customise each learning environment with unique administrators, content, and appearance.

- Configure specific access and memberships for each learning environment.

Create an ecosystem of individual customised learning environments in a single LMS site.

# Make informed decisions

- Track learning progress regarding certifications, programs, and courses for better training decisions.

- Build custom reports for audiences in a drag-and-drop interface with instant preview.

- Provide an immediate view for managers to identify and support employees falling behind in their learning assignments.

- Automatically share learning reports with the relevant stakeholders.

Managers can build custom reports for audiences in a drag-and-drop interface with instant preview.

# Success Spotlights

**Dallah Driving Company** trains thousands of drivers in Saudi Arabia with Moodle Workplace.

**Escuela Del Agua** uses Moodle Workplace to develop competency frameworks to deliver online training services.
